

## Atividade 4 – Sistemas de apoio à Decisão

Jomar Gonçalves Ramos

Primeiramente o usuário deve acessar o site: [www.github.com](https://github.com) e criar uma conta. Basta clicar em “Sign Up” e preencher os dados requeridos como username, password e email.

The screenshot shows the GitHub sign-up page. At the top, there's a navigation bar with links for Personal, Open source, Business, Explore, Pricing, Blog, and Support. A search bar and 'Sign in'/'Sign up' buttons are also present. The main heading is 'Join GitHub' with the tagline 'The best way to design, build, and ship software.' Below this, a three-step process is outlined: Step 1: Set up a personal account, Step 2: Choose your plan, and Step 3: Tailor your experience. The 'Create your personal account' section includes input fields for Username, Email Address, and Password, each with a brief explanation of the requirements. To the right, a box titled 'You'll love GitHub' lists benefits like 'Unlimited collaborators', 'Unlimited public repositories', and 'Great communication'. The bottom of the page shows a Windows taskbar with various application icons.

Para criar um repositório basta acessar sua conta do GitHub selecionar a opção “Start a Project”.

A promotional banner with a light blue and green gradient background. The main text reads 'Learn Git and GitHub without any code!' in a large, bold, dark blue font. Below it, in a smaller, lighter blue font, is the text 'Using the Hello World guide, you'll create a repository, start a branch, write comments, and open a pull request.' At the bottom, there are two buttons: a green 'Read the guide' button and a light gray 'Start a project' button.

# Create a new repository

A repository contains all the files for your project, including the revision history.

Owner

 jzinhov

Repository name

sad\_ufs\_jomar\_amos ✓

Great repository names are short and memorable. Need inspiration? How about **refactored-octo-parakeet**.

Description (optional)

☒  **Public**  
Anyone can see this repository. You choose who can commit.

☐  **Private**  
You choose who can see and commit to this repository.

☐ **Initialize this repository with a README**

This will let you immediately clone the repository to your computer. Skip this step if you're importing an existing repository.

Add .gitignore: **None**

Add a license: **None**

File Edit Plugins View Tools Help

The screenshot displays the pgAdmin 4 interface. On the left, the 'Object browser' pane shows the database hierarchy for 'PostgreSQL 9.5 (localhost:5432)'. The 'Databases (2)' folder is expanded, showing 'Sad'. Under 'Sad', the 'Schemas (1)' folder is expanded, showing the 'public' schema. The 'Tables (8)' folder under 'public' is selected, displaying a list of tables: 'endereco', 'funcionario', 'gestor', 'item', 'pedido', 'produto', 'usuario', and 'vendedor'. On the right, the 'Properties' pane is active, showing the 'Table' and 'Owner' columns for the selected table. The 'Table' column lists the table names, and the 'Owner' column lists 'postgres' for all tables. The 'Comment' column is empty. The bottom status bar indicates 'Refreshing tables... Done.'
